

ECOSPEED
Business

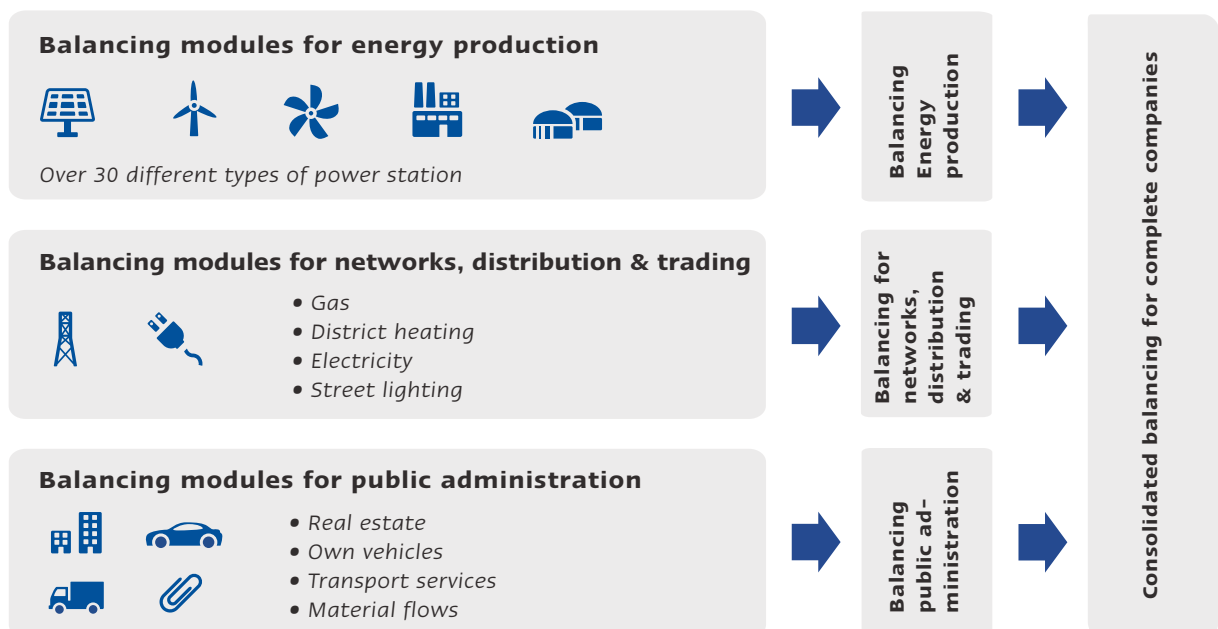

Efficient energy management for
energy suppliers and public utilities

ECOSPEED Business is specially designed for the needs of businesses and organisations and has been newly expanded to include a sector-specific solution for energy suppliers and public utilities.

Working in association with the Stadtwerke Aachen public utility (STAWAG), we have developed web-based and standardised software that is the first of its kind in Europe: it provides energy suppliers and public utilities with a simple and efficient way of preparing a comprehensive energy and greenhouse gas balance in accordance with the Greenhouse Gas Protocol.

Tailor-made balancing for energy suppliers and public utilities

Benefits to you at a glance

- Professionalisation of the entire environmental balancing process
- Simple and flexible data consolidation of company units with various stakeholders across all facilities and locations
- Variable modules and generation of relevant air-conditioning and efficiency KPIs for internal and external communication
- Build-up of know-how for a corporate carbon footprint with the option of offering business clients a new service
- Strategic, competitive advantages by positioning as an environmentally aware supplier
- Online service which is instantly usable and always up-to-date
- Guaranteed data protection
- Attractive introduction prices

Standards supported

- Greenhouse Gas Protocol
- ISO 14001, 14064 & 50001
- Global Reporting Initiative
- Carbon Disclosure Project
